

Download *CACKey* and install:  
[Mac OS X 10.6 and newer](#)

Download *Citrix Workspace* and install:  
<https://www.citrix.com/downloads/workspace-app/mac/workspace-app-for-mac-latest.html>

During the install, select Add Account when asked.

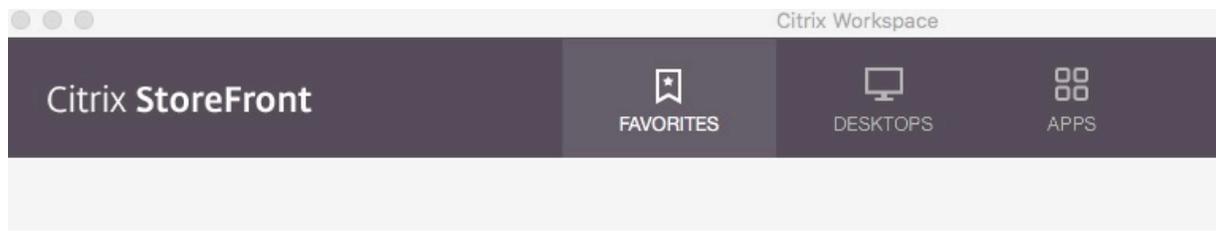

**Be sure your Smartcard is inserted before proceeding**

You will be asked to enter your work email or server address, please enter **access2.cpsc.gov** and click Add.

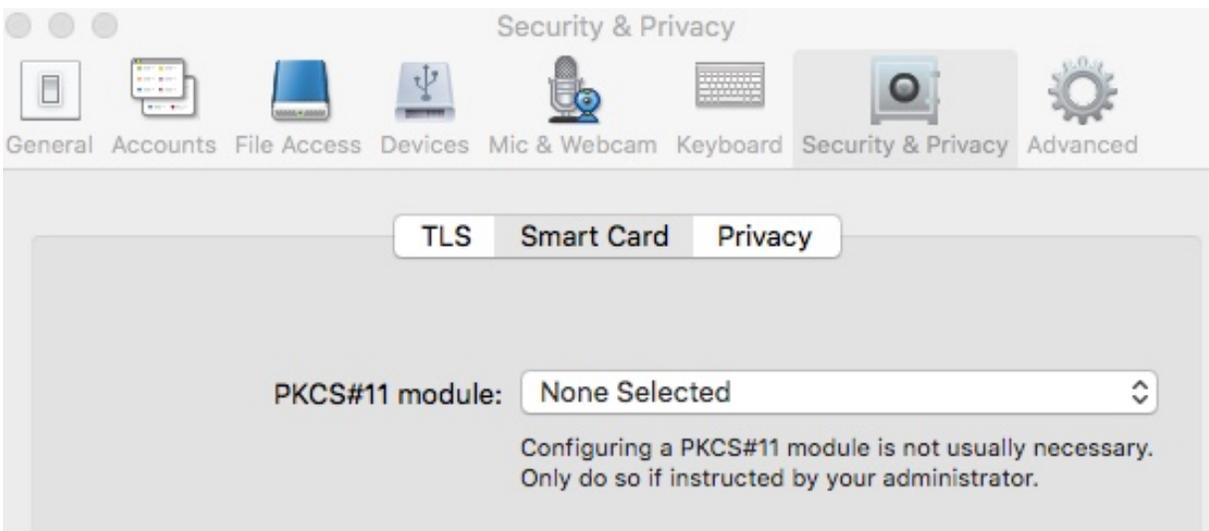

During the add process, you will likely be asked for your PIN a total of three times, please continue to choose the same certificate and enter your PIN until the Account Selection window appears (below) If this window does not appear or you have trouble proceeding past this point, please try connecting to <https://access2.cpsc.gov> from Safari, as newer versions of OS X have been seen to work without configuring the account information.

Account	Description
HQ	
CIS	
External	

Please select **HQ** from the list to continue. You will likely be asked a couple more times for your PIN, please continue to enter it until the process completes and you will see this screen.

In the event that you are still unable to login, please click on the Citrix Workspace icon  near the clock in the top right and choose Preferences. Select **Security and Privacy, Smart Card...**

Select **Other** and locate this file:

`/Library/CACKey/libcackey_g.dylib`
